Whether it's a management or investment venture, you need a business partner who has integrity, does the job and offers you a healthy ROI. Western states offer just that. Since our owners come from both the hospitality industry and the healthcare industry, we are not just talking about excellent customer service. We really know what it takes to take care of people – partners, guests, residents and staff. We believe that people are the most important in our business. We work honestly with clients and stay true to our word. Our residential environments are inviting, caring and welcoming as we bring our own personal touch to every relationship. Yes, we build buildings, but what really matters is the development of the community. Western States Lodging & Management was founded in 1996 with a clear understanding of what it means to take care of people. With experience working for places like Marriott Corporation in hospitality and senior life departments, our managing partners have learned how to offer quality content and excellent customer service. Motivated by a desire to find a work-family balance, our managing partners decided to launch their own venture and founded Western States Lodging & Management. Our experience in hospitality has made building fine senior communities and hotels a natural first step. We have built each of our hotels and senior communities with exact standards to which our partners are accustomed. We take great care of creating environments where guests and residents feel comfortable, while maintaining profitability and healthy ROI. Sensing the vital need for affordable, quality communities of assisted living with Alzheimer's care and rehabilitation services, we branched out into healthcare. We found that we can offer all the additions of a well-placed hotel while providing a home-like atmosphere and state-of-the-top healthcare to our residents and patients. Home health, hospice, pharmacy and funeral assistance options followed as we sought to provide the best in health services to our residents. The key to our success is gaining the trust of our clients. Family members of our residents have peace of mind knowing that their loved ones receive the love, compassion and quality care they deserve. Every guest, resident and patient comes with experience at home. In the end, is all about the people that we and the communities we build. At Western States Lodging & Management, we follow the philosophy of personal touch in every object. We take the time to meet our guests and residents, looking for ways to provide care beyond what is expected. Our company was founded on moral principles and traditional family values that we learned growing up. We believe in treating people with honesty and compassion. We listen carefully to each partner, guest, resident and tenant, answering any question or concern on a personal level. Since our management team has experience in both the hospitality and health industries, we bring the best of both industries to everything we do. Guests in our hotels, convention centers and apartments feel at home and are treated with care and compassion. We give older properties special details that are located in well-placed hotels, while maintaining a pleasant, caring and homely atmosphere. 📍 The VisusPage TransparencyFacebook displays information to help you better understand the purpose of the page.
